Summary

Data Scientist with a Bachelor’s degree in Computer Science from Kabarak University, certified in Python, and currently pursuing advanced certifications in Data Science, AI, and Machine Learning. I have 1+ year of hands-on experience building end-to-end data solutions, including ETL pipelines, predictive models, model evaluation workflows, and business intelligence dashboards. My work focuses on transforming raw data into reliable insights, developing interpretable models, and supporting data-dr

Education

Kabarak University

Bachelor of Computer Science
Sep 2021 — Dec 2025

Technical Skills

Python, Exploratory Data Analysis (EDA), Power BI, Dashboard Development, ETL Pipelines, SQL, Model Monitoring, KPI Reporting

Soft Skills

Collaboration, Problem-solving, Communication, Time management, Result-oriented

Additional Skills

Public Speaking, Writing, Research

Languages

English, Swahili

Certifications

- Data Science Certified Professional Ongoing
- Python Development Certified Professional
- Introduction to Data Science

Work Experience

Jamii Telecommunications

Nov 2025 — May 2026

Data Science and IT Support Intern

Jamii Telecommunications is a leading internet provider company and telco giant.

- Provided technical support and troubleshooting for IT systems and end-user devices in a production environment.
- Developed and tested machine learning models for business use cases, including customer churn prediction.
- Built and optimized churn prediction workflows using data preprocessing, feature engineering, and model evaluation techniques.
- Created and improved visualization tools and dashboards to communicate model outputs and operational insights to stakeholders.
- Supported data validation, reporting quality checks, and dataset preparation for analytics and model development workflows.
- Documented support tickets, model workflows, and technical procedures to improve team efficiency and reproducibility.

Kocela Limited

Jan 2025 — May 2025

Software Developer Intern

Kocela Limited is a startup focusing on mobile money and financial technology.

- Developed and maintained web applications using Play Framework and MySQL in a collaborative team environment.
- Implemented backend integrations and optimized database queries to improve application performance.
- Supported API integration and bug fixes across features to improve stability and user experience.
- Worked across development tasks with structured delivery timelines and version-controlled workflows

Freelance Developer

Jan 2023 — May 2026

Freelance Data Science and Software Developer

Undertook clients' contracts to deliver on various deliverables.

- Delivered data science and machine learning solutions, including churn prediction, pricing models, and analytics dashboards.
- Built ETL-style data workflows for cleaning, transforming, and preparing datasets for reporting and model training.
- Developed BI dashboards using Power BI and visualization tools to support KPI tracking and business decisions.
- Implemented AI-enabled and data-driven features in client applications using Python frameworks and model outputs.
- Provided ongoing maintenance, optimization, and technical support for deployed solutions.

Khetias Supermarket

Jul 2022 — Jan 2023

Created using https://atsresume.vercel.app

- Artificial Intelligence and Machine Learning Certified

IT Consultant

Khetias Supermarket is a chain of outlet supermarkets operating in most parts of the country.

- Performed system troubleshooting, operating system installations, and hardware/software support.
- Trained staff on business systems and digital tools to improve operational efficiency.
- Supported IT infrastructure reliability through issue resolution and preventive maintenance practices.
